 ZB MED Search Portal
for Life Sciences

A search portal for life sciences

A search portal for life sciences

Life sciences are a closely intermeshed field of knowledge which calls for a truly interdisciplinary approach. Specialising in medicine, health, and nutritional, environmental and agricultural sciences, ZB MED is the perfect choice to meet this challenge. In 2015 the library launched a search portal for life sciences known as LIVIVO. This interdisciplinary research tool offers scientists and researchers a one-stop discovery service for life sciences which ZB MED will be continuously improving over time.

The databases covered by LIVIVO include (amongst others):

- ▶ ZB MED catalogues
- ▶ MEDLINE, the database of the American National Library of Medicine (NLM)
- ▶ AGRICOLA, the catalogue of the American National Agricultural Library (NAL)
- ▶ AGRIS, the specialised literature database of the Food and Agriculture Organization of the United Nations (FAO)
