

Advice on open access publishing from ZB MED

The decision to publish a scholarly paper and its research data at the same time throws up a number of complex issues. ZB MED can help you by providing up-to-date advice on the best path to follow.

Our consulting services are aimed at the following groups:

- ▶ Researchers and academics in life science fields
- ▶ Key disseminators and supporters at scientific libraries, graduate schools and university life science departments

The issues we can advise on include the following:

- ▶ Benefits of open access
- ▶ Green vs. gold open access publishing (i.e. immediate publishing in an OA journal vs. self-archiving in a repository)
- ▶ Quality of open access journals
- ▶ Setting up open access journals and transforming subscription journals into open access publications
- ▶ Publishing research data
- ▶ Research data management

We offer advice in the following formats:

- ▶ FAQs on the PUBLISSO website
- ▶ Personal advice by phone or e-mail
- ▶ Video tutorials and webinars
- ▶ Organising in-house information events for the target groups listed above We offer multiple different formats (lectures, workshops, seminars, etc.) and can tailor each event to whatever topics and level of knowledge you feel are appropriate.

Please get in touch to find out more.
