

**Research data in the life
sciences arena –
what ZB MED offers**

Groups of life science specialists are increasingly recognising the importance of managing and publishing research data in an effective and efficient manner. Data management plans have even become a prerequisite for funding research projects in many areas.

ZB MED offers various services related to research data:

Advice and information

- ▶ Personal advice
- ▶ Workshops, lectures and presentations
- ▶ FAQs and lists of approved data repositories for life sciences at www.publisso.de
- ▶ DOI service: assignment of persistent identifiers (DOIs) as a member of DataCite

Publishing services for research data

- ▶ Publishing research data in parallel with GMS articles in the DRYAD data repository
- ▶ Publishing research data in the specialist repository for life sciences

Research data management
